PERSONAL STATEMENT

I am a full-stack developer and UI/UX designer with experience building web applications using React, Node.js, Express, Django, and MongoDB. I also design user-friendly interfaces with Figma and pay attention to both function and design. I have worked on real projects, joined tech challenges, and enjoy learning about cybersecurity and new technologies. I'm looking for opportunities to grow my skills and work on useful software with real impact.

WORK EXPERIENCE

Full stack developer Intern

TechWise

25th April 2024 - 13th May 2024, Kigali - Rwanda

Independently built a full-stack web application using Django as part of a school-based internship. Handled backend logic, database design, and frontend development. Managed the entire project alone, gaining practical experience in full-cycle software development.

PROJECTS

Skuul

April 2025 - Present

I'm developing a school management system that will manage schools like school book in libraries and help in other tasks like assigning students with work like Homework or some other form of assignments. For now I have developed the library part, which means librarian can add books, notify students to return them. And students can register themselves in the library and can borrow and return books. The project also features a leaderboard to help reward best readers.

EDUCATION

Highschool Diploma

World Mission Highschool

2022 - Present (Graduation in July)
